

## ABSTRACT

“Equipment for receiving a weapon, especially a small-calibre weapon, such as a small-arm, for a test bench”

Equipment for receiving a small-calibre weapon for a test bench having a mount provided with receiving means for securing the weapon.

The equipment comprises

- a receiving means (4, 5) provided with clamping screws (9, 12) for receiving and locking in position the weapon (A) to be tested,
- a positioning means (6, 7, 11) carried by the receiving means (4, 5),
- an interface (10) moulded on the weapon (A) and the positioning means (6, 7, 11),
- the clamping screws (9, 12) connected to the receiving means (4, 5) and clamping the moulded interface (10) against the weapon (A).
